

# Multi-stem *Allegheny Serviceberry*

(*Amelanchier laevis*)

Flowering Tree

15' - 25' High

15' - 25' Spread

Medium Growth Rate

Full Sun/Part Shade

Various Soils

Upright Oval Shape

This small, upright, multi-stemmed tree is also known as Juneberry, because of its edible pea sized fruits that ripen in June. The Serviceberry is quite versatile and can be used in both formal settings and natural landscapes. It natively grows as an understory tree, along the edges of woodlands, so it can tolerate some shade. It also blooms with white flowers in early spring, and it has a beautiful reddish yellow fall color. Plant in an area with well drained soil for best growth. (Zones 4 - 8)
