

Overdam Feather Reed Grass

(Calamagrostis x acutiflora 'Overdam')

Perennial Grass

2' - 4' Tall

2' Wide

Moderate Growth

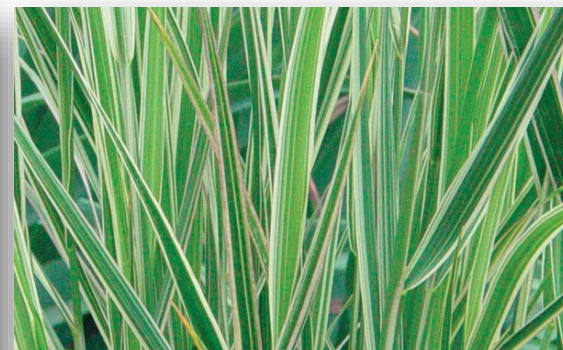

Full Sun

**Water Needs:
Moderate**

Zones 4 - 8

'Overdam' Feather Reed Grass is best known for its variegated leaves. The green and cream stripes mix together in this grass to create an eye-catching piece that stands out in any landscape. The tight, upright form of this grass allows it to fit into narrow spaces. It can work as a stand alone grass, or it can be used to edge an area. Cut back this grass just before spring to add winter interest as well.
