

Canada Red Chokecherry

(*Prunus virginiana* 'Schubert')

Ornamental Tree

20' - 30' High

15' - 20' Spread

Medium to Fast Growth

Full Sun

Well Drained Soils

Upright Oval Shape

The Canada Red Chokecherry features showy chains of fragrant white flowers that hang below the branches in mid spring. Leaves emerge green in the spring and change to a deep purple in the summer, and fall display is a warm purple. The black pea-sized cherry-like fruits ripen in mid summer, and attract birds and other wildlife. The fruits can also be used in jams or jellies. The Canada Red Chokecherry is a self-pollinating variety that is drought tolerant and winter hardy once established. (Zone 3 - 5)
