

Multi-Stem Redbud

Iowa Native

(*Cercis canadensis*)

Ornamental Tree

20' - 30' High

25' - 35' Spread

Round Shape

Growth

Moderate

Partial to Full Sun

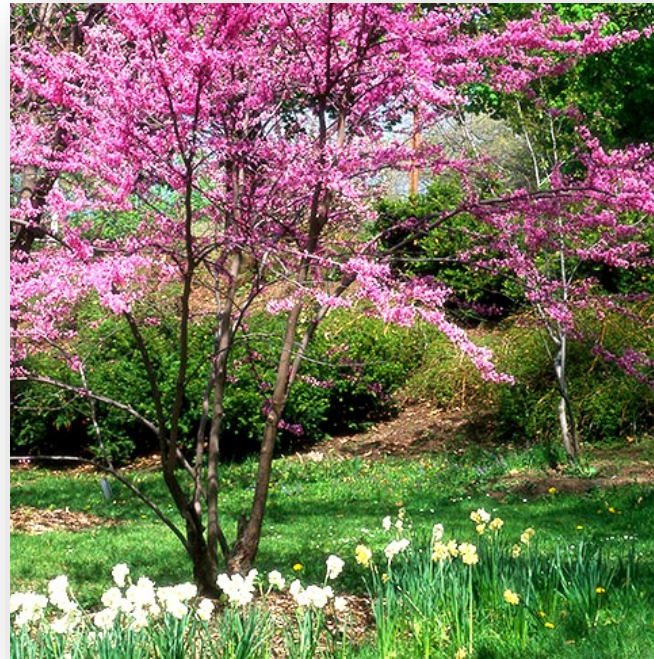

Water Needs

Moderate

Zone 2 - 9

The redbud is a welcomed sight in early spring, as it is one of the first flowering trees to bloom. It has beautiful pink flowers that encapsulate the entire tree. The newly emerging foliage is copper colored, and changes to green as the leaves expand. It can grow in full sun or part shade. The smooth grey bark and wide arching branches secure the redbud as a well-loved favorite.
