

Douglas Fir

(*Pseudotsuga menziesii*)

Evergreen

40' - 60' High

12' - 20' Spread

Slow to Medium Growth

Full Sun

Various Soils

Pyramidal Shape

The Douglas Fir is a large evergreen that offers many attractive features. It has a nice full canopy that spreads all the way to the ground, and unlike many spruce varieties the Douglas fir has a softer needle, making it attractive for neighborhoods with playful kids. They prefer a sunny location with moist, deep soil, but will grow in a variety of soils. The Douglas Fir is commonly used as a screen, and it makes excellent cover for birds. It is a low maintenance tree that requires little pruning. (Zones 4 - 6)
