

Javelin[®] Pear

(*Pyrus* 'NCPX1')

Ornamental Tree

30'- 35' High

8'- 12' Spread

Medium Growth

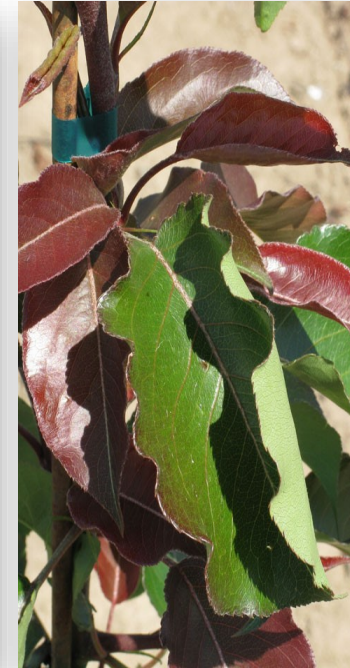

Full Sun

Various Soils

Columnar Shape

The Javelin[®] Pear is the tightest and most columnar pear we have seen, it stays narrow as it matures. The unique foliage of this tree leaves out purple, and matures to bronze green in the heat of summer. Bloom time for this pear is late spring to early summer. Due to its extremely narrow size this columnar tree can fit into almost any landscape. The Javelin[®] Pear also offers good resistance to fireblight. (Zone 5 - 9)
