

Tulip Tree

(*Liriodendron tulipifera*)

Shade Tree

60' - 80' High

30' - 50' Spread

Oval Shape

**Growth
Fast**

Full Sun

**Water Needs
Moderate**

Zone 4 - 9

The Tulip Tree is a unique tree in Iowa, and it is gaining popularity. The Tulip Tree is named after its large uniquely shaped leaves and solitary flowers, which both resemble tulips. It is a fast growing tree that can reach a height of up to 80'. It has a relatively narrow shape, because it puts on height much faster than width. It is quite adaptable and loves wet soil. The Tulip Tree also has a nice yellow fall color, so it adds interest year round.
