

Prairifire Crabapple

(*Malus x 'Prairifire'*)

Ornamental Tree

15' - 20' High

10' - 15' Spread

Round Shape

Growth

Moderate

Full Sun

Water Needs

Moderate

Zone 4 - 8

The Prairifire Crabapple is an all around nice flowering tree. It has a beautiful pink bloom in the early spring, and the newly emerging leaves have a nice reddish tint to them. Throughout the summer months the canopy is a shiny green, but the new growth will continue to have a reddish tint to it. The fruits on the Prairifire are red and glossy, which adds to the fall beauty of this tree. The Prairifire Crabapple also has good apple scab, cedar-apple rust, and fireblight resistance.
