

# Wildfire Black Gum

*(Nyssa sylvatica 'Wildfire')*

**Shade Tree**

**30' - 50' High**

**20' - 30' Spread**

**Pyramidal Shape**

**Growth**

**Moderate**

**Full Sun**

**Water Needs**

**Moderate**

**Zone 5 - 9**

The Wildfire Black Gum has bright red new foliage in spring, turning rich dark green before a brilliant fall color of yellow-orange, and vibrant scarlet. Brownish black bark is heavily textured adding interest even when the tree defoliates for winter. Red-tinged branches also add winter interest. Great alternative to a Maple!
