**Shade Tree**

**40' - 60' High**

**20' - 30' Spread**

**Pyramidal Shape**

**Growth**

**Moderate**

**Full Sun**

**Water Needs**

**Moderate**

**Zone 4 - 10**

The Bald Cypress is an interesting tree that has some very unique characteristics. Fern-like foliage is soft and easily swayed by gentle breezes making a graceful accent to your landscape. As if this lovely display weren't enough, autumn brings gorgeous hues of cinnamon-red to your Bald Cypress that will certainly turn heads throughout the fall season. When its bright fall foliage has fallen, its copper brown peeling trunk is revealed.
