

Princeton Elm

(*Ulmus americana* 'Princeton')

Shade Tree

50' - 75' High

30' - 50' Spread

Oval Shape

Growth

Moderate

Full Sun

Water Needs

Moderate

Zone 3 - 9

The Princeton Elm has a great shade producing canopy for a faster growing tree. This large tree presents good resistance to Dutch elm disease and demonstrates resistance to elm beetles as well. This fast growing shade tree is tolerant to adverse conditions, so it is a great roadside or commercial tree. It has a yellowish orange fall color.
