

Butterflies Magnolia

(*Magnolia 'Butterflies'*)

Ornamental Tree

15' - 25' High

10' - 15' Spread

Round Shape

Growth

Moderate

Full Sun

Water Needs

Moderate

Zone 4 - 9

Butterfly Magnolia Trees let you know that spring has officially arrived by covering themselves with bright yellow blossoms. Each flower is a vibrant shade of canary yellow, and they glow in the landscape like miniature orbs of sunlight, erasing winter drear from your garden. The bright blossoms get their butterfly name because each flower petal points upwards, giving them the look of butterfly wings.
