

Spring Snow Crabapple

(*Malus 'Spring Snow'*)

Ornamental Tree

20' - 25' High

15' - 20' Spread

Round Shape

Growth

Moderate

Full Sun

Water Needs

Moderate

Zone 4 - 8

The Spring Snow Crabapple is a completely fruitless variety of crabapple that offers many of the appealing attributes that other crabapples have. The Spring Snow gets its name from the abundant white spring blooms that cover the tree. These blooms offer a nice fragrance that can be enjoyed throughout a yard. It also has a yellow fall color. The Spring Snow Crabapple also has good cedar-apple rust, and mildew resistance.
