

Starlite[®] Crabapple

(*Malus x 'Jeflite'*)

Ornamental

20' - 25' High

12' - 15' Spread

Oval Shape

Growth

Moderate

Full Sun

Water Needs

Moderate

Zone 2 - 7

The Starlite[®] Crabapple is strikingly similar to an ornamental pear. It has a nice oval shape and glossy green leaves. Red buds burst open to white flowers in the spring before the foliage emerges. In fall the leaves will turn yellow and contrasting small red fruits will add nice color to your yard.
