

Norway Spruce

(*Picea abies*)

Evergreen Tree

40' - 60' High

25' - 30' Spread

Pyramidal Shape

**Growth
Fast**

Full Sun

**Water Needs
Low**

Zone 3 - 7

In comparison to other spruces, the Norway Spruce is a fast grower. The Norway Spruce develops strong graceful branches that are covered with dark green needles. Young branches point upwards, and as the tree ages, branches become pendulous, with long pinecones hanging vertically. This tree is very hardy overall, including good winter hardiness. It is an ideal windbreaker and privacy screen tree. The Norway Spruce prefers well drained soils.
