

D'Anjou Pear

(*Pyrus communis* 'D'Anjou')

Fruit Tree

10' -15 ' High

10' - 15' Spread

Growth

Moderate

Full Sun

Water Needs

Moderate

Zone 4 - 9

The D'Anjou Pear is an excellent cold hardy variety of pear. It has white blooms in the spring followed by green fruit that are ready to harvest in September. The secret to this delectable pear is to pick it green and let it ripen in storage. **Self-pollinating.**
