

Summercrisp Pear

(*Pyrus 'Summercrisp'*)

Fruit Tree

10' - 15' High

10' - 15' Spread

Growth

Moderate

Full Sun

Water Needs

Moderate

Zone 4 - 8

The Summercrisp Pear blooms white in the spring and its foliage will turn bright yellow in the fall. Fruit is ready to pick in late summer when the fruit is green with a slight red hue. Summercrisp pears have a sweet taste and crisp exterior. They can be stored in a fridge for up to 6 weeks. **Self-pollinating.**
